**College Algebra Ron Larson Solutions** - [EPUB] [PDF] *College Algebra Ron Larson Solutions*

In linear algebra, an eigenvector or characteristic vector of a linear transformation is a non-zero vector that changes by only a scalar factor when that linear transformation is applied to it. More formally, if  $T$  is a linear transformation from a vector space  $V$  over a field  $F$  into itself and  $v$  is a vector in  $V$  that is not the zero vector, then  $v$  is an eigenvector of  $T$  if  $T(v)$  is a scalar ...
